

Many people have turned to xeriscaping to help conserve water year-round. An important piece of this particular landscaping puzzle is plant varieties. We offer a large selection of plants that survive well in dry conditions once they are established. This usually takes one full growing season for grasses, perennials and woody species. Check out the list below for some great recommendations. \* indicates a shade-loving, drought tolerant plant. If you would like more information visit [www.plantselect.org](http://www.plantselect.org).

## ANNUALS

- Begonia \*
- Chrysocephalum
- Cleome
- Cosmos
- Dianthus, Carnation
- Dichondra
- Dusty Miller
- Eschscholzia
- Linaria
- Lisianthus
- Portulaca
- Ptilotus
- Rudbeckia hirta
- Sanvitalia
- Succulent
- Zinnia

## GRASSES

- Bouteloua
- Calamagrostis
- Cortaderia
- Erianthus
- Festuca
- Helictotrichon
- Lagurus
- Miscanthus
- Panicum
- Pennisetum Hameln
- Schizachyrium
- Stipa

## HERBS

- Epazote
- Marjoram
- Oregano
- Rosemary
- Thyme

## PERENNIALS

- Achillea
- Aegopodium
- Ajuga \*
- Alyssum
- Aquilegia \*
- Arenaria
- Armeria
- Artemisia
- Aubrieta
- Catananche
- Centaurea
- Centranthus
- Cerastium
- Coreopsis
- Delosperma
- Dianthus
- Digitalis \*
